## **DETAILED ACTION**

### **STATUS**

Claims 22,24,25, 31-33,36,38-45, 56 and 57 are pending.

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 22, 24, 25, 31-33 and 56-57 are drawn to secure transaction with authentication, classified in class 705 subclass 64.
  - II. Claims 36 is drawn to capturing financial information, classified in class 705 subclass 35.
  - III. Claims 38-45 are drawn to a secure transaction with authentication, classified in class 705 subclass 67.

Inventions I, II and III are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed in invention I does not require the particulars of the subcombination as claimed in inventions II such as a user interface or as claimed in invention III such as authentication.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
